

Mission Statement

The mission of Edgewater Computer Systems, Inc. is to apply superior techniques in analysis, design, test and verification to create and develop new and innovative technologies for military and commercial applications to enhance capabilities, performance and security while ensuring safety and reliability.

Quality Policy

1. Edgewater's Quality Management System shall successfully meet all requirements stipulated in the ISO 9001:2015 standard.
2. Corrective Action / Preventive Action (CAPA) plans shall be defined by the owner of the corrective action and be submitted to the Quality Manager and appropriately dispositioned in a timely manner.
3. Customer issues shall be duly recorded, reported to the Quality Manager, and dispositioned in a timely manner by the owner of the issue.
4. Communication between the Quality Manager and President shall be on a regular basis and major issues shall be raised at the weekly Management Meeting by the President and, if applicable, with the support of the Quality Manager.
